Five key business insights

Insight 1: Sales increased consistently
Annual sales increased from approximately $2.26 million in 2011 to $4.30 million in 2014, representing about 90% growth. This indicates strong historical revenue growth.
Insight 2: Central is the highest-revenue region
The Central region generated approximately $2.82 million in sales and $311,404 in profit, making it the leading region by sales and profit.
Insight 3: Consumer customers contribute the most revenue
The Consumer segment generated approximately $6.51 million, representing 51.5% of total sales. Corporate customers contributed approximately $3.82 million, while Home Office customers contributed $2.31 million.
Insight 4: Technology is the strongest product category
Technology generated approximately $4.74 million in sales and $663,779 in profit, outperforming Furniture and Office Supplies on both measures.
Insight 5: Revenue does not always translate into strong profitability
Furniture generated approximately $4.11 million in sales but only $285,205 in profit, while Office Supplies generated less revenue ($3.79 million) but more profit ($518,474). This suggests Furniture has a profitability challenge worth investigating.

Three business risks

Risk	Evidence	Why it matters
Low furniture profitability	$4.11M sales but only $285K profit	High revenue may hide weak margins
Regional profitability differences	Southeast Asia generated about $884K sales but only $17.9K profit	Some regions may have high costs or discounts
Customer concentration	Consumer customers account for about 51.5% of sales	Weakness in this segment could significantly affect revenue

Three business opportunities

Opportunity	Evidence	Potential benefit
Expand profitable Technology sales	Technology produced approximately $664K profit	Increase earnings
Improve Furniture profitability	Furniture's profit is relatively low compared with its sales	Increase overall profit margin
Grow Corporate and Home Office segments	Together they contribute about 48.5% of revenue	Diversify revenue

Five actionable business recommendations

Recommendation	Evidence	Management action
1. Prioritize Technology products	Technology has the highest category sales and profit	Increase marketing and inventory support for consistently profitable Technology products
2. Review Furniture pricing and discounts	Furniture generates $4.11M sales but only $285K profit	Investigate discount levels and costs, then revise unprofitable pricing
3. Investigate Southeast Asia	Approximately $884K sales but only $17.9K profit	Review loss-making products, discounts, and shipping costs in the region
4. Strengthen Consumer retention	Consumer customers generate 51.5% of revenue	Introduce targeted loyalty and repeat-purchase campaigns
5. Expand profitable Corporate sales	Corporate contributes approximately $3.82M revenue	Develop targeted business-customer offers and monitor their profitability
